(a) Tail rows collapse; HWA prevents it
tail / head row norm
generator round
GeFL-F wd=1e-3
GeFL-F wd=1e-4
GeFL-F wd=0
HWA wd=1e-3
(b) Theorem 1 holds in every round
actual change of ||r_c|| (%)
bound: change of ||r_c|| allowed (%)
(c) Tail rows shrink although m_c > K/2
row norm end / start
holders m_c of class c
old rule: K/2
flat FedAvg
HWA
